LAMPE CABANON

Le Corbusier

In 1952, on the shores of the French Riviera, Le Corbusier built “Cabanon”: the absolute archetype of essential living. The project, executed according to the rules of the Modulor, is found just a stone’s throw away from the sea and served as a refuge for the architect in his final years. Lampe Cabanon, named after the inspired microcosm, represents a symbol of architecture, design, production, and essential living. The lampshade, made from tracing paper that the architect used, was crafted from a wartime artifact – a mortar shell carrier – found on French beaches. The lamp, for which numerous sketches and designs exist, represents a moment of rebirth in the post-war world.

LAMPE CABANON

LAMPING

Source	E27 LED
Total power	25W
Switching	dimmable on cable, according to bulb
Tension	230V
IP class	IP20
Dimensions	8.2'x16.5'
Notes	cable length 8.8’, LED 4-25W, green RAL 6016

Codes
CAB ENW 11

Structure
gunmetal/green, tracing paper sheet
