LAMPE CABANON

Le Corbusier

In 1952, on the shores of the French Riviera, Le Corbusier built "Cabanon": the absolute archetype of essential living. The project, executed according to the rules of the Modulor, is found just a stone's throw away from the sea and served as a refuge for the architect in his final years. Lampe Cabanon, named after the inspired microcosm, represents a symbol of architecture, design, production, and essential living. The lampshade, made from tracing paper that the architect used, was crafted from a wartime artifact – a mortar shell carrier – found on French beaches. The lamp, for which numerous sketches and designs exist, represents a moment of rebirth in the post-war world.

NEMO

LAMPE CABANON

LAMPING

Source E27 LED Total power 25W

Switching dimmable on cable, according to bulb

Tension 230V Ip class IP20 Dimensions 8.2'x16.5'

Notes cable length 8.8', LED 4-25W, green RAL 6016

Codes Structure

CAB ENW 11 gunmetal/green, tracing paper sheet
