

SWAN PLUS

Bernhard Osann

A graphic symbol, essential lines that accentuate the Swan lamp's great flexibility of movement and functionality. A productive intuition and a sophisticated mechanism make the lamp arm extendable from 134cm to 184cm while preserving the linearity and composure of the design. The adjustable light source offers precise and punctual illumination. The counterweight, an essential part of the design, is covered in Testa di Moro leather.

SWAN PLUS
