

# LAMPE CABANON

*Le Corbusier*

In 1952, on the shores of the French Riviera, Le Corbusier built “Cabanon”: the absolute archetype of essential living. The project, executed according to the rules of the Modulor, is found just a stone’s throw away from the sea and served as a refuge for the architect in his final years. Lampe Cabanon, named after the inspired microcosm, represents a symbol of architecture, design, production, and essential living. The lampshade, made from tracing paper that the architect used, was crafted from a wartime artifact – a mortar shell carrier – found on French beaches. The lamp, for which numerous sketches and designs exist, represents a moment of rebirth in the post-war world.

# LAMPE CABANON

## LAMPING

Source	E27 LED
Total power	25W
Emission	diffused
Switching	dimmable on cable, according to bulb
Tension	230V
IP class	IP20
Dimensions	21x42
Notes	Cable length 2,5m, LED 4-25W

## Codes

CAB ENW 11

## Certificazioni

UK  
CA

## Structure

Gun metal/green tracing paper sheet
