

KEPLER

Arihiro Miyake

Lampade a sospensione disponibili in tre dimensioni Kepler, Kepler Minor e Kepler Petite.

La struttura è un estruso di alluminio verniciato, la cui linea continua è realizzata attraverso un processo di lavorazione tridimensionale ingegnerizzato da Nemo e disegnata sulla base del principio geometrico del nastro di Moebius.

Disponibile nelle versioni “up” con fonte luminosa verso l’alto e versioni “down” al contrario verso il basso nelle finiture verniciate opache bianco, nero e oro.
