

BORNE BÉTON GRANDE

Le Corbusier

It was 1952 when Le Corbusier designed Borne Béton for the outdoor area of the Unité d'Habitation in Marseille and to enlighten Bhakra Dam, Sukhna Dam in India. An early experiment in the use of concrete for a collection of lamps along the lines of Brutalist architecture. Raw, spartan concrete is combined with a built-in LED source, combining different volumes emphasised by light. The small aesthetic and finishing variations make each Borne Béton a unique project.

LED OUTDOOR IP44

LAMPING

Source	LED board
Total power	38,5W
Emission	direct
Tension	110-240V
Color temperature led	3000K
Luminous flux led	1920lm
Typ CRI	80
Ip class	44
Dimensions	50x36x50cm
Materials	concrete + PMMA
Notes	cable length 3m, body and cable IP65 rated
Net lamp weight	53 kg

Codes

BBG LDW 23

Structure

concrete

PACKAGE

Package 01

Dimension: 59x45x66 cm / Gross weight: 61 kg
