## BORNE BÉTON GRANDE

Le Corbusier

It was 1952 when Le Corbusier designed Borne Béton for the outdoor area of the Unité d'Habitation in Marseille and to enlighten Bhakra Dam, Sukhna Dam in India. An early experiment in the use of concrete for a collection of lamps along the lines of Brutalist architecture. Raw, spartan concrete is combined with a built-in LED source, combining different volumes emphasised by light. The small aesthetic and finishing variations make each Borne Béton a unique project.

## LED OUTDOOR IP44

## **LAMPING**

Source LED board 38,5W Total power Emission direct Tension 110-240V Color temperature led 3000K Luminous flux led 1920lm Typ CRI 80 44 Ip class

Dimensions 50x36x50cm Materials concrete + PMMA

Notes cable length 3m, body and cable IP65 rated

Net lamp weight 53 kg

Codes Structure BBG LDW 23

**PACKAGE** 

Package 01 Dimension: 59x45x66 cm / Gross weight: 61 kg

concrete
